Work Experience

Minnesota United FC — Team Photographer
2013 — 2019
Golden Valley, MN

My duties over the years have grown to include covering pregame sponsor activations, in-game action and isolated player photos, and post-game activations. I have also covered MLS stadium ground-breakings, press conferences and major team announcements. Over the course of a typical game day, I take over 3000 images, process those images with Adobe Lightroom and turn in over 400 professional level images the next day.

Ryan Siverson Photography
2009 — Present

I am a freelance music, sports and event photographer with a strong work ethic and an eye for the unique perspective. I have covered some of the biggest concerts in the Twin Cities, and Red Bull extreme sports, and also professional sports teams in action. I have learned how to use social media as an effective asset and tool. I have also worked with several marketing firms and weekly publications to capture events.

FedEx Express
2007 — 2020
Arvada, CO

This is an extremely fast-paced environment where details make the difference. I am a driver and cover a busy area with constant changes and challenges sent to me throughout the day. Last year, I received my 11 year safe driving award. I am on my own for 6-10 hours a day and expected to be exact and accurate at all functions throughout the day.

Apple Computer
2007-2010
Roseville, MN

Working for Apple started out as a sales position and then expanded to so much more. Ongoing training lead to getting into hardware and software troubleshooting and Apple computer training through the One to One program. This was an extremely fast-paced, crowded, small store and teamwork was essential.

Education:
Full Stack Programming
Denver University
Denver, CO
2020 — Present

Anoka Ramsey Community College
Coon Rapids, MN

Metropolitan State University
Saint Paul, MN

Interests

My interests include programming, Videography, and Photography. I have worked for several publications in Minnesota, and was the home photographer for Major League Soccer club Minnesota United. I have recently gone back to school for Full Stack Programming.

Skills: I am currently enrolled at Denver University in the full time Full Stack Programming bootcamp. I am learning front and backend technologies including JavaScript, HTML, CSS, APIs, Github, and Node.js. I have a vast knowledge of computer programs such as Microsoft Office, Adobe Lightroom. I have driven a W700 delivery truck for almost 13 years and drive it in all weather conditions.
