Business Management | Metropolitan State University, Saint Paul, MN 2004

Projects

Alewery

Description: Enter Alewery. We are a front range taproom resource for beer selection, description, quantity, and location. We are a service for breweries and, potentially, consumers. We allow a brewery to expose their taproom selections to consumers. We allow consumers to quickly find their preferred beer selections and where they can go to enjoy those selections today.

Technologies used in Project: Node.js, Express, Express-Session, Sequelize, JavaScript, HTML, CSS, PUG, MySQL, BCRYPT, BCRYPTJS, Passport, Routes.

GitHub URL: <https://github.com/rysipphoto/Alewery>

Deployed URL: <https://mighty-depths-48025.herokuapp.com/>

Boozy Food

Description: This site was inspired by not having easy access to a grocery store while COVID-19 was disrupting the supply chain in grocery stores. The Spoontacular API would generate several recipes based on up to three food items you have at your disposal. On the left-hand side, we added a random drink generator to give you inspiration for a drink of your choice you'd like to make. The color palette consists of warm tones.

Technologies used in Project: Bulma UI, JavaScript, HTML, CSS, External APIs.

Deployed URL: <https://kimberlitompkins.github.io/project1/>

Cheap Travel

Description: Finding a cheap getaway right now is paramount at a time like this. It's also incredibly helpful to find reviews and tips for vacation destinations, along with finding the best deals! That is why we created this site. A React built site that allows you to log in using Auth0 and leave reviews of

inexpensive trips you have taken to inspire others. A travel API has been implemented to search for cheap travel as well.

Technologies used in Project: React, JavaScript, HTML, CSS, External APIs, MongoDB, Auth0, Express, REST, MERN, Mongoose, Semantic UI Routes.

Work Experience

Major League Soccer Team Photographer 2013 – 2019
Minnesota United FC; Golden Valley, MN

- Collaborated with several departments within the club to achieve goals and covering pregame sponsor activations, in-game action, isolated player photos, and post-game events.
- Have covered MLS stadium ground-breakings, press conferences and major team announcements.
- Over the course of a typical game day, over 3000 are images, process those images through Adobe Lightroom and deliver 400 professional images within 24 hours to the team and league.

Owner 2009 – Present
Ryan Siverson Photography; Minneapolis, MN / Denver, CO

- Covered music, sports and corporate events with a strong work ethic and an eye for the unique perspective.
- Photographed some of the biggest concerts in the Twin Cities, Red Bull events, Roller Derby, Premier League and International Rugby and Major League Soccer and North American Soccer League clubs in action and behind the scenes.
- Use social media as an effective asset and tool.
- Publications include Vita.MN, City Pages, The Growler.

Courier 2007 - 2020
FedEx Express; Minneapolis, MN and Arvada, CO

- Excelled in extremely fast-paced environment where details make the difference.
- Able to convey great customer service and deliver on tight deadlines while creating a special customer experience is part of the job.
- Eleven years Safe Driving Award.
- Self-motivated and surpassing productivity goals 6-12 hours a day while maintaining an accuracy rate over 99%.

Sales / Creative 2007-2010
Apple Computers; Roseville, MN

- Ongoing training lead to helping with basic hardware and software troubleshooting.
- Taught customers how to use new computers through the One to One training program.
- Worked well as a team in a fast-paced, crowded, small store where teamwork was essential.
